### DROVER ENERGY SERVICES

*INNOVATIVE & EXPERIENCED  
PRODUCTION ENHANCEMENT  
COMPANY*

**DROVER ENERGY SERVICES** is a full service Capillary & Production Enhancement provider for domestic, international and offshore markets. The Drover team has a combined 100 years experience in the capillary industry with a diverse background in numerous oilfield disciplines. Most prominently, the majority of our team was a big part in the 1<sup>st</sup> world leader of capillary with previous company, DYNA-COIL. This experience ranges from capillary, small coil intervention, specialty projects / applications and chemical services. DROVER's subsidiary company, HYDESSCO, specializes in the fabrication of oilfield equipment. Providing another valuable tool to our customers in built to spec equipment, consultancy and Drover operated services. In over 20 different countries, we have continued our service in deploying successful solutions and fresh thinking ideas to the artificial lift and production enhancement industries.

### EQUIPMENT

worldwide production enhancement and capillary solutions

**DROVER ENERGY SERVICES** has invested heavily in high quality, small footprint & versatile equipment. Whether loaded onto a vessel, trailer or offshore barge its direct focus is towards operational convenience and safety, thus providing our customers with a proven method of capillary installations during "live well" and even extreme pressures and severe conditions worldwide. Turnkey, custom capillary and consultancy is provided to our customers. Built to spec equipment, micro-tubes, chemicals, experienced deployment crews and follow up training. A list of Drover's products and services is provided below. Visit our website or call to discuss your unique applications. We welcome the challenge!

The success of the customer has been the main reason for the worldwide growth of the capillary industry, attributed to the simple proven concept of a precise continuous delivery of chemical directly at the area of need. Whether installed offshore in conjunction with safety valves or the remote regions of the Middle East, our goal is to maximize production and reduce lifting cost by delivery continuous chemical solutions directly downhole.

DROVER ENERGY SERVICES employs highly trained operators to work both domestically and internationally. Drover's deployment crews have been responsible for working in over 20 countries worldwide. Each operator is highly trained in well control and working in high pressure & offshore applications. Drover Energy is committed to Safety and the welfare of its people and the environment.

## SERVICES

Capillary  
 Chemical services  
 Remote Chemical Tank Monitoring  
 Capillary Deployed Temperature & Pressure Sensors  
 Offshore Capillary installations  
 Small intermediate Coil Tubing  
 Consultancy & Specialty Projects  
 International  
 Domestic

## CHEMICAL APPLICATIONS

Foamers • Asphaltenes • Emulsions Breakers  
 Corrosion • Scale Inhibition  
 Salt • Liquid Loading • Hydrates • Paraffin

## OTHER APPLICATIONS

Coil Cleanouts • Nitrogen Lifts  
 Y-Body Coil/Cap Well Intervention  
 Capillary with Fiber Optics  
 Permanent Offshore Installations  
 Capillary for Gas Lift  
 Umbilical Cleanouts

## FEATURES OF CAPILLARY

Tubing can be Removed & Installed Multiple Times  
 Minimal Wellhead Modifications  
 Eliminates Downtime  
 Provides Multiple Solutions  
 Proven Metal Alloys in Severe, High Pressure Environments  
 Versatile Modular Equipment
